

# 2MW mobile energy storage container in Tokyo for power grid distribution stations

Does Pacifico energy have a battery storage facility in Japan?

The facility is Pacifico Energy's third operational grid-scale BESS project in Japan. (Image: Pacifico Energy) Pacifico Energy commissioned its first unsubsidized grid-scale battery storage project in Japan, a 2MW/10MWh facility in Koganei City, Tokyo, on December 9, 2025.

Does Japan have a grid-scale battery storage business?

This report aims to provide an overview of the early-stage grid-scale battery storage business in Japan, identify key challenges, and outline the direction of future development.

Why are battery storage projects growing in Japan?

The ramp up of battery storage projects in Japan continues apace, aided by growing subsidy avenues and rising volumes on various electricity markets, from spot to balancing to capacity.

Why did METI launch a new 'green' capacity auction system?

It's no surprise that as METI launched an entirely new "green" capacity auction system this year, officials made sure to allocate up to a quarter of its initial 4 GW on offer to battery and other energy storage projects. The need to incentivize more balancing capacity in Japan is strong.

Leveraging its domestic experience in renewable generation and storage, as well as insights from advanced overseas markets, the company remains committed to achieving grid parity ...

Erex will build a 2MW/8MWh grid-scale battery storage facility in an undisclosed location in the Tokyo TSO area, the company announced on January 9, 2026. According to the statement, the asset will be ...

This report aims to provide an overview of the early-stage grid-scale battery storage business in Japan, identify key challenges, and outline the direction of future development.

Pacifico Energy commissioned its first unsubsidized grid-scale battery storage project in Japan, a 2MW/10MWh facility in Koganei City, Tokyo, on December 9, 2025.

By 2030, official estimates show variable renewable energy reaching 20% of Japan's power mix. Noting the demand case and ever-growing renewables curtailment numbers nationwide, ...

GLASHAUS POWER - As Tokyo accelerates toward its 2030 carbon neutrality goals, container-based power generation equipment emerges as a game-changer. These modular systems combine solar ...

The Storage Squeeze: When Sunshine Doesn't Pay the Bills Japan's solar farms generate enough juice to power 30 million homes daily. But here's the rub - without proper storage, up to 40% of this ...

BESS Station in the Tokyo Electric Power Company Area erex Co., Ltd. (Head Office: Chuo-Ward, Tokyo;

# 2MW mobile energy storage container in Tokyo for power grid distribution stations

Representative Director and President: Hitoshi Honna; hereinafter referred to as ...

Investment Decision for the 2nd Grid-Scale BESS Project Construction of a "2MW Output / 8MWh Storage Capacity" Scale BESS Station in the Tokyo Electric Power Company Area

Local Adaptation 2MW is the "golden capacity" in Japan's commercial and industrial energy storage market, offering three key advantages: load matching, power trading economics, and ...
