The InfraStruXure PDU is designed to increase flexibility and agility of data center power distribution through a design that does not require a raised floor.

Equipped with 42-position panels to effectively distribute power to connected loads.

The APC InfraStruXure PDU is an industrial-grade, external power distribution cabinet engineered for demanding environments with a 60 kW capacity and 3-phase AC 208V input.

Designed to increase flexibility and agility of data center power distribution through a design that does not require a raised floor.

The PD Power Systems 60KW PDP is designed to accept power at 120/208 VAC, 3-phase, utilizing 200 amp Power connectors. Power is then distributed at 120/208 VAC 3-phase and 120 VAC 1-phase.

Description APC InfraStruXure PDU - Power distribution cabinet - AC 480 V - 60 kW - 3-phase - black

Distributes power to smaller distribution units, environmental control units, portable lights and for expeditionary applications including base camps.
