

Are photovoltaic panels allowed to be installed

What are the regulations for installing solar panels on your property?

Arguably, the most important regulations for those looking to install solar panels on their property are those that consider the placement or positioning of the solar panels. These vary depending on whether your property is for commercial or domestic purposes.

Do I need permission to install a solar panel?

Generally, any solar panel installation under 1MW is permitted without any additional approval required. Similarly to domestic installations, for no permission to be requested, there are several regulations to be met for commercial solar panel installations.

Are solar panels allowed on a property?

Certain conditions must be met for permitted development rights for solar panels which include: Panels must not protrude more than 200mm from the roof. This helps to protect the appearance of the building. The solar panels must not affect the structure of the roof or the appearance of the property.

Can solar panels be installed on a roof?

Building regulations require solar panels to only be installed if there is structural integrity. This clearly states that the roof must be examined to confirm it can hold solar panels. An installer is essential to check the weight of the solar panels that will be supported by the roof.
