

ASEAN Energy Expo Attracts Global Leaders: The 2025 ASEAN Energy Storage Expo in Bangkok featured over 200 exhibitors, including industry giants like CATL, Huawei, and Trina Solar,...

This review explores the development of energy storage technologies and governance frameworks in the Asia-Pacific region, where rapid economic growth and urbanisation drive the ...

Corporates with production facilities in the region too are seeing battery storage microgrids, typically with rooftop solar, as a means to meet their sustainability goals and gain long-term control over energy ...

Carrie Xiao examines some notable recent partnerships and supply agreements for Chinese energy storage players in the Middle East, Europe, Africa and Australia.

Both India and Indonesia are investing in energy storage to support their respective energy transitions. Given the size of each market, these could become two of the largest players in ...

Discover the current state of energy storage companies in Asia, learn about buying and selling energy storage projects, and find financing options on PF Nexus.

This study explores the performance, integration strategies, and financial difficulties of solar energy storage systems, focusing on the integration of renewable energy sources like solar and ...

The Asian continent is experiencing a surge in the development and implementation of energy storage solutions, which are essential for managing the integration of renewables like solar ...

Enabled by their mass deployment and ambitious policy support, innovations in solar cells, wind turbines, energy storage systems and grid technologies are becoming increasingly ...

Summary: This article explores the rapid growth of energy storage power stations across East Asia, highlighting key technologies, regional projects, and market opportunities.
