

As Europe races toward climate neutrality, Bulgaria's surge in storage capacity signals a shift not only in national priorities but also in regional energy dynamics.

Bulgaria's second standalone energy storage procurement exercise of 2025, worth close to BGN 229 million, received a lot of interest and there are 30 project proposals included in a reserve ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage into ...

Bulgaria approves funding for 31 battery energy storage projects totaling 4 GWh under the RESTORE 2 program.

storage is hindering Bulgaria in the development of an energy storage market. Furthermore, Bulgaria's energy legislation and grid codes have been historically written with thermal plants in mind, ...

The tender was launched last year, aiming to significantly increase the share of renewable energy, mainly wind and solar, in the country's energy mix. It would also contribute to ...

Bulgaria's Ministry of Energy has approved EUR588 million in funding for 82 standalone battery energy storage projects, totaling nearly 9.7GWh of usable capacity. The final decision, ...

The 31 projects will create more than 4 GWh in usable energy storage capacity, the Ministry said.

Transformation of AES Galabovo into a large-scale energy storage facility using proven technology implemented in concentrated solar power plants (CSP) using molten salts

Bulgaria is accelerating its energy transition and is shaping up to be one of the leading markets for energy storage systems in Europe, as more than 1.5 GWh of storage capacity is in ...
