

# Can solar photovoltaic panels be polished

Can you clean solar panels yourself?

If you notice a drop in your system's energy output or visible debris on panels, it's a good idea to clean them right away. You can clean your solar panels yourself, but you must do it safely and correctly. Here's how: Shut down the system: Turn off your inverter and follow the manufacturer's shutdown procedure.

Do photovoltaic solar panels need maintenance?

In France, there is sufficient wind and rain to adequately clean and rinse off photovoltaic solar installations, but you may also wipe down the panels with a sponge if you wish. As far as maintenance is concerned, it serves to remind that photovoltaic solar panels do not require any special technical maintenance. That's right.

What is solar panel cleaning?

First and foremost, let us introduce the two different terms discussed in this article: Solar panel cleaning: this entails washing the panels like windows. The cleaning may be combined with preventive maintenance of the solar collectors.

Should I clean my solar panels if it rains a lot?

In many parts of the country, occasional rain is typically enough to naturally and safely keep your solar panels clean and free of debris that could lower their energy production. So, if you get a good amount of rain this year, you can likely skip a cleaning or two.

Polishing a solar panel requires the right product and the right technique. **DO NOT** use any polish, but use a specific polish designed for plastics such as the Novus range or Plexus or 3M. ...
