

Cape town electricity bills

How much does electricity cost in Cape Town?

The Cape Town electricity price varies based on a number of factors including consumption levels, the type of user (residential, commercial, or industrial), and even geographic location within the city. As of the latest update, residential electricity prices range from approximately R1.70 to R2.28 per kWh, dependent on the tier of usage.

Are Cape Town electricity tariff changes a lifeline?

The Cape Town electricity tariff changes are more than numbers--they're lifelines, struggles, and aspirations. As we navigate these currents, let's remember that behind every switch, there's a family striving to keep their lights on. While navigating these tariff changes, it's crucial to adopt energy-saving practices.

Should you buy prepaid electricity in Cape Town?

One of the most persistent beliefs about prepaid electricity is that buying larger amounts at once will save you money. In truth, Cape Town uses an "inclined block tariff" system, where the cost per unit rises as you cross certain usage thresholds.

Where does electricity come from in Cape Town?

Although the majority of electricity is generated by Eskom power stations, the price households pay depends on who supplies the electricity. It can either come directly from Eskom, or via the City of Cape Town. The supplier decides on the tariff itself, the amount for FBE, and any changes made to the tariffs.
