

Cheating solar power subsidies

Solar panels are cheaper than ever, helping improve access to renewable energy. But subsidies and excess production capacity have reshaped global solar manufacturing, with risks for trade and supply ...

And, just at a time when Americans are finally enjoying true energy security and independence after decades of dependence on untrustworthy foreign governments for our energy, ...

The gap between government subsidies for wind and solar and those for reliable thermal power units like natural gas, nuclear, and coal is massive, and thanks to the Inflation Reduction Act ...

The U.S. solar subsidy regime, exemplified by the Inflation Reduction Act, not only contravenes international trade agreements but also distorts the global solar market, hindering ...

Ending the massive cost of taxpayer handouts to unreliable energy sources is vital to energy dominance, national security, economic growth, and the fiscal health of the Nation.

After months of speculation and debate about unfair Chinese subsidies to domestic solar manufacturers, the U.S. solar industry finally has an answer to one piece of the ongoing trade case:...

Federal Government has forced American taxpayers to subsidize expensive and unreliable energy sources like wind and solar. The proliferation of these projects displaces affordable, reliable, ...

As Secretary of Energy -- and someone who's devoted his life to advancing energy innovation to better human lives -- I, too, know how these Green New Deal subsidies are fleecing ...

Subsidies are easy to obtain for an electric car, as are subsidies for solar panels. However, both are being targeted by profiteers seeking to obtain public money illegally.

The U.S. solar subsidy policies, represented by the Inflation Reduction Act, disregard multilateral trade rules, making the use of domestic goods rather than imported goods a condition for ...
