

Civilian young man generates electricity with solar panels

While traditional solar panels rely heavily on direct sunlight to function efficiently, a new technology developed by Carvey Ehren Maigue, an engineering student from Mapua University in ...

Carvey Ehren Maigue, a student from Mapua University in the Philippines, developed a solar panel unlike any seen before. His invention AuREUS (Aurora Renewable Energy and UV Sequestration) ...

Enjoy the videos and music you love, upload original content, and share it all with friends, family, and the world on .

A young Nigerian man using self-generating electricity with solar panels has shared a video. The man showed people one way he maintains his solar panels to generate more electricity in ...

A young Nigerian creates a startup that transforms plastic waste into solar energy and brings electricity to 10 refugees. This award-winning invention revolutionizes access to electricity in Africa.

Discover the groundbreaking invention of a Filipino student, Carvey Ehren Maigue, who has changed the renewable energy landscape with AuREUS--solar panels made from recycled food waste! ? In...

A young Nigerian man using self-generating electricity with solar panels ...

While storms clouded the Philippine skies and city buildings blocked the sun, this visionary engineering student from Mapua University imagined a future where even gloomy days could bring light--and ...

Some solar energy technologies include photovoltaic cells and panels, concentrated solar energy, and solar architecture. There are different ways of capturing solar radiation and converting it into usable energy.

That's exactly what a young innovator in the Philippines discovered. Using discarded food scraps, he developed a solar panel that generates electricity even without direct sunlight.

Filipino student Carvey Ehren Maigue creates solar panels from food waste that generate electricity from UV light, even indoors.
