

Cuban outdoor power supplier

Does Cuba have a comprehensive energy policy?

Currently, the global power generation sector is undergoing a massive transformation, as a result of increasing pressure to reduce carbon emissions and rapid and profound technological developments in renewable energy. Cuba lacks a detailed strategic roadmap towards a comprehensive national energy policy that addresses these challenges.

What happened to Cuba's energy sector in 2022?

Various press reports suggest additional reductions occurred during 2022. Electric power has become the Achilles' heel of Cuba's energy sector and economy, as its oil-based distribution and thermoelectric generation collapsed due to age and lack of scheduled and capital maintenance.

How much electricity does the residential sector consume in Cuba?

In Cuba, the residential sector absorbs 60% of the electricity produced, compared to 42% on average in the Caribbean. Between 2000 and 2020, the residential sector in Cuba more than doubled its total consumption. In order to understand this, there are several factors to consider.

Why does Cuba have a bad energy system?

Cuba's energy system also suffers from years of reliance on domestic, poor-quality heavy crude oil, which is corrosive because it's high in sulfur. This has accelerated the wear and tear on boilers, turbines, and pipes in Cuba's power plants, shortening their life spans and causing frequent and costly outages.
