

In order to stabilize the grid, the municipality and the Fürstenfeld public utility decided last April to build the battery storage system with a power output of 12 MW and a storage capacity of 24 ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage into regional ...

Research topics related to ICT solutions include, among others, how to integrate storage facilities into energy systems, determining industrial facilities' energy requirements or how to supply energy using ...

The top expansion projects focus on completing the southern 380 kV ring, strengthening east-west transmission corridors and links to western Austria (pumped-storage facilities), supporting ...

In this issue, we present several pioneering Austrian projects on heat storage technologies and report on the involvement of Austrian experts in the International Energy Agency's technology programmes on ...

Unser Projekt "Underground Sun Storage" wurde als eines der Zukunftsprojekte im österreichischen Pavillon vorgestellt. Mit innovativen Lösungen rund um Grünes Gas wie der „Methan-Elektrolyse“ ...

This article explores the technical innovations, market trends, and environmental benefits of large-scale battery storage systems, with insights into how projects like this are reshaping Europe's energy ...

Slovenia-based NGEN put Austria's largest battery energy storage system into operation. It installed it in record time - just seven months.

Several large-scale battery storage projects are going online in Austria in 2026. They demonstrate how diverse the applications are - from balancing energy markets to agrivoltaics to ...

This article explores the technical specifications, market implications, and environmental benefits of this groundbreaking initiative while analyzing global energy storage trends.

EK Austria in energy storage projects
