

A resilient and cost-efficient energy system requires both centralised and decentralised flexibility, making the reactivation of residential and commercial storage a priority. This edition of the ...

As renewable energy adoption accelerates worldwide, the ranking of energy storage product shipments has become a critical indicator of technological leadership and market adaptability.

The Q1 2025 data highlights a dynamic energy storage market, with CATL leading while competitors intensify their rivalry in both large-scale and portable segments.

Global energy storage battery shipments are projected to reach 392 GWh in 2025, up from 314.7 GWh in 2024 [2] [9]. That's like replacing every AA battery in your junk drawer with ...

The latest update to its Global Li-ion Battery and Battery Manufacturing Equipment data by Interact Analysis reveals energy storage (ESS) battery shipments are expected to drive global ...

According to InfoLink's latest Global Energy Storage Supply Chain Database, global energy storage cell shipments reached 612.39 GWh in full-year 2025, up 94.59% YoY. Full-year ...

Global new battery energy storage system additions 2020-2030; Global needs of battery storage capacity in power sector 2030-2050, by scenario; Battery market size worldwide by technology 2018 ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector ...

Battery producers in China have been expanding the capacity of ESS batteries to offset the slowing EV growth rate amid falling costs for the production of lithium batteries, sources told ...

Energy storage battery shipments grew faster than those of power batteries, overseas exports made up around 20% of the total, while the domestic market accounted for around 80%.
