

Energy storage container fan soundproof cover

What is a reusable Sound Control Blanket?

Our reusable, high temperature, sound control blankets are an ideal fit for compressor noise and fan housing noise applications. Our pre-engineered acoustic blanket systems are designed to fit three-dimensionally around a noise source to help quiet the component creating the obtrusive noise.

What is a velcro-sealed Sound Control Blanket?

Noise Control's removable velcro-sealed sound blankets help address sound directly at the source. Our reusable, high temperature, sound control blankets are an ideal fit for compressor noise and fan housing noise applications.

Are sound blankets reusable?

Sound blankets are removable and reusable. Another great benefit of our sound control systems is ease of installation. Blanket pieces install with minimal effort and they feature a stainless steel wire-twist fastening system. No additional tools or materials are required for installation.

What is a sound blanket?

Made from composite materials of Teflon impregnated cloth and loaded vinyl noise barrier, the sound blankets are custom-fit to encapsulate noisy equipment and block sound at the source. Commonly used on chillers and refrigeration units, fans/blowers, compressor housings, hydraulic pumps and other equipment where space is at a premium.
