

Fiji outdoor summer solar air conditioning

Do you need air conditioning in Fiji?

The heat and humidity can be oppressive, making air conditioning a must-have in homes and businesses. Air conditioning systems in Fiji typically use split systems, with an outdoor condenser and an indoor evaporator or fan coil. These systems are often installed with a ducted system that distributes cold air throughout the home or business.

How do air conditioning systems work in Fiji?

Air conditioning systems in Fiji typically use split systems, with an outdoor condenser and an indoor evaporator or fan coil. These systems are often installed with a ducted system that distributes cold air throughout the home or business. Many systems also feature a dehumidifier that helps to reduce humidity levels in the space.
