

# Fixed gas and electric

What is a fixed price energy deal?

Fixed price energy tariffs provide price certainty for customers in an uncertain energy market. Compare fixed energy deals here or read on to find out more about them. How do fixed energy deals work? Fixed price gas and electricity tariffs guarantee that their unit rates won't go up or down.

Are fixed energy deals a gamble?

Fixed energy deals can be a gamble. If energy prices rise, you stand to make some big savings against a standard variable tariff. If they don't, you could end up paying over the odds and be faced with an early exit fee should you decide to switch. Should I compare fixed energy deals?

What is a fixed energy rate?

A fixed energy rate is exactly what it says on the tin: it fixes the price you pay for gas and electricity for a set amount of time. Energy suppliers typically offer fixed deals that last anywhere from 12 to 24 months. Fixed rates are based on the price of energy per unit, plus the standing charge.

Should you switch to a fixed energy deal?

At the time of writing (July 2025), most people who haven't switched in a while are likely to be able to save money by getting a fixed energy deal. This is because they're probably on their supplier's "default" tariff where prices are set by the price cap.

Compare gas and electricity prices with us, from multiple energy suppliers. Compare energy rates from the "big six" and find the right deal for you.

With wholesale energy prices more stable and several providers now offering deals significantly cheaper than the current energy price cap, now may be a great time to start shopping ...
