What is a P/E ratio?

The P/E ratio,often referred to as the "price-earnings ratio",measures a company's current stock price relative to its earnings per share (EPS). The relative valuation method ("comps") estimates the fair value of a company by comparing a standardized ratio to its peer group,or competitors operating in the same industry or sector.

How do you calculate price-to-earnings ratio (P/E)?

When combined with EPS,the P/E ratio helps gauge if the market price accurately reflects the company's earnings (or earnings potential). The price-to-earnings ratio can also be calculated by dividing the company's equity value (i.e. market capitalization) by its net income. Price-to-Earnings Ratio (P/E) = Equity Value ÷ Net Income

How do you calculate P/E ratio?

P/E Ratio = Current Stock Price ÷ Earnings Per Share (EPS)Where: To account for the fact that a company could've issued potentially dilutive securities in the past,the diluted share count should be used -- otherwise,the EPS figure is likely to be overstated.
