

High-performance solar glass

COOL-LITE® SKN 144 II is a high-performance solar control coated glass, which features an extremely low solar factor that keeps the maximum amount of heat out without completely cutting off the natural ...

A new study has found that solar panels, which are made with 50% recycled glass, perform just as well as new ones.

From sleek skyscrapers that shimmer in the sun to smart homes that strike a balance between comfort and energy efficiency, high-performance glass is everywhere around us. Its ...

Indygreen Technologies provides high-performance patterned solar glass designed to enhance light transmission and reduce energy loss through absorption and reflection.

High-performance glass technologies play a crucial role in improving energy efficiency in buildings and vehicles, contributing to climate change mitigation efforts by reducing energy consumption and ...

High-performance glass offers superior thermal insulation, solar control and sound insulation compared to regular glass, contributing to building energy efficiency and comfort.

Performance with you in mind. With a solar heat gain coefficient of 0.24 and 60% visible light transmission*, SNX 60+ glass delivers thermal performance without sacrificing natural light - for ...

What is Solar Control Glass? Solar control glass is a type of high-performance glazing that reduces the amount of solar heat entering a building. Filtering infrared radiation and reflecting ...

In hot conditions or for building with high internal loads, solar control glass is used to minimize solar heat gain. It allows sunlight to pass through a window while radiating and reflecting away a large amount ...

Premium low iron solar glass delivering superior light transmission, enhanced durability, and improved solar panel efficiency. Engineered for optimal performance in photovoltaic and solar thermal ...
