

Household photovoltaic panel installation recruitment

How do I become a solar installer?

You could start as an installation labourer, working with qualified installers, and do training on the job with the support of your employer. If you're a qualified electrician you could take a short training course in the installation and maintenance of small solar photovoltaic (PV) systems.

Can a qualified electrician fit solar panels to a building?

If you're a qualified electrician you could take a short training course in the installation and maintenance of small solar photovoltaic (PV) systems. This would allow you to fit solar panels and connect them to a building's electrical mains network. You could take solar PV training to fit solar panels to buildings if you're a qualified roofer.

What does a senior solar installer do?

A leading renewable energy firm in Nassau tasked us with sourcing a Senior Solar Installer to lead solar projects across the Caribbean. The role required experience in installing grid-tied, battery, and hybrid solar systems, along with team management and hands-on installation.

What does a certified solar installer do?

Certified in solar installation, the candidate excelled in site assessments, system commissioning, and mentoring junior technicians. Since joining, they've consistently delivered high-quality installations, enhanced team performance, and strengthened client relationships, supporting the firm's regional leadership in solar energy solutions.
