

How much does a 20kW collapsible container cost for Southeast Asian ports

How much does shipping cost in 2026?

The composite price index increased by 16% between Christmas and the first week of January 2026. However, this is only a relative increase rather than a net rise, as prices remain 36% lower than this time last year. Drewry's World Container Index puts the global average price of shipping a 40ft container at \$2,557 (USD) for 8 January, 2026.

Why are international container shipping prices rising?

International container shipping prices continue to rise, following the upward trajectory that started mid-December. This is largely due to carriers pushing up Freight All Kinds (FAK) rates. The composite price index increased by 16% between Christmas and the first week of January 2026.

How much does it cost to ship a 40ft container?

Drewry's World Container Index puts the global average price of shipping a 40ft container at \$2,557 (USD) for 8 January, 2026. Freightos offers a similar assessment of container shipping prices for the start of the New Year, with a global average price of \$2,502 (USD) for 9 January, 2026.

What size container is best for shipping?

When comparing prices for container shipping and transport, the size of the container will affect the price. While there are over a dozen different-sized containers, 20-foot (TEU) and 40-foot (FEU) containers are the most frequently used. What fits in a TEU will determine the cost of shipping.
