

The report covers India's rooftop solar market, including progress, policies, and project viability across states, highlighting growth, regulatory support, business models, metering, and state ...

Ground Mounted Solar Plant : 107.26 GW Grid Connected Solar Rooftop: 24.30 GW Hybrid Projects (Solar Component) : 3.36 GW Off-Grid Solar: 5.68 GW

To promote Indian-made solar products, the government has made it mandatory for projects under schemes like the Rooftop Solar Programme, PM-KUSUM, and CPSU Scheme Phase ...

In 2018, India's rooftop solar capacity stood at a modest 1 GW. By 2024, it surged to almost 12 GW - a tenfold increase. Rooftop solar is playing a pivotal role in the Indian government's ...

While solar rooftop has been a laggard, but given the challenges that utility-scale solar faces with land procurement and transmission issues, solar rooftop can play a big role in meeting ...

This article discusses the growth trend of RTS in India, the capacity of installed RTS across various regions in the country and challenges in RTS uptake by residential consumers.

The CEEW report projects that India's 250 million households have the potential to collectively install up to 637 GW of rooftop solar capacity, which could potentially fulfil one-third of the ...

In a remarkable growth, India has added 4.9 GW of rooftop solar capacity between January and September 2025, marking a staggering 161% increase compared to the previous year. ...

About 81% of India's current solar capacity is already ground mounted. Disputes over land use are slowly increasing. Therefore, it is imperative to boost India's grid-connected rooftop solar ...

Rooftop solar installations in India surged 155% in H1 2025. This analysis covers capacity additions, policy support, cost trends and adoption momentum.
