

Introduction to Brazil's Co-Storage Energy Storage Project

Should Brazil invest in energy storage?

Brazil's energy storage sector must attract R47 billion (\$7 billion) in investments by 2030, according to the Brazilian Energy Storage Solutions Association (Absae). Stakeholders are in the process of creating a regulatory framework for energy storage.

What is the panorama of storage in Brazil?

The launch of the Panorama of Storage in Brazil marked a breakthrough in technical discussions and symbolized the beginning of a new era for the Brazilian electricity sector. With its eyes on the regulatory framework, the storage market has the potential to be one of the great drivers of the national energy transition.

Can foreigners invest in battery storage businesses in Brazil?

Investment, incentives and taxation scenarios According to Brazilian law, there are no legal restrictions on direct foreign investment in the battery storage businesses or in the power sector (except in very specific segments or sectors of the economy).

Can Brazil be a big battery storage country?

With well-designed policies and regulations, Brazil has significant potential to follow in the footsteps of jurisdictions like California and Chile for large-scale battery storage, Germany for distributed and large-scale storage, and Australia for both pumped hydro and large-scale battery systems.

Through a professional training strategy, the project holds capacity -building sessions for different actors in the sector and offers technical and political consultancies to support the wide use ...

Explore Brazil's battery energy storage systems, focusing on current regulations, investment opportunities, and the role of these systems in the energy transition.

With abundant sunlight, ambitious climate goals, and a hunger for grid stability, Brazil's renewable energy sector is dancing to a new rhythm. In 2025 alone, projects like the Ilha Solteira hydropower ...

The Brazilian Association of Energy Storage Solutions (ABSAE) predicts that installations in Brazil's commercial and industrial (C& I) segment should exceed 2 GWh in 2026. In addition, the ...

CELA specializes in wind energy, solar energy, energy storage, and green hydrogen, working with its clients in the Energy Transition

The GeoStorage Project includes the development of solutions such as a hydrogen super battery, energy storage with compressed air, and blue hydrogen in the pre-salt layer.

The Brazilian energy storage market will be one of the main pillars of the national plan to update the country's electricity sector. This was one of the insights shared by Absae during the ...

Introduction to Brazil's Co-Storage Energy Storage Project

A recent example is a 1MWh thermal energy storage project by an Israel-based company, Brenmiller Energy, in partnership with Fortlev, the largest provider of water storage solutions in Brazil.

Energy storage It is a source of pride to be the pioneering company in large-scale energy storage in batteries within the Brazilian transmission system. We energized the country's first project in 2022 at ...

INTRODUCTION Brazil's energy generation matrix is already recognized worldwide for its high share of renewables. However, the rapid expansion of solar and wind generation introduces ...
