

Jiaotong University Energy Storage System

What does Wang Shuguo say about Xi'an Jiaotong University?

Wang Shuguo, president of Xi'an Jiaotong University (XJTU), delivers a speech at the summit on Feb 23. In his speech, XJTU President Wang Shuguo pointed out that the energy revolution is related to the sustainable development of the world in the future, and more importantly, the great rejuvenation of the Chinese nation.

What is the national energy storage technology industry-education integration innovation platform?

L M S The National Energy Storage Technology Industry-Education Integration Innovation Platform was launched on Feb 23 at iHarbour, Xi'an Jiaotong University (XJTU). At the same time as the launch, a summit meeting was held for serving the goals of peaking CO2 emissions by 2030 and achieving carbon neutrality by 2060.

What is XJTU's energy storage system?

XJTU Professor He Yaling, the director of the platform, said the university has carried out systematical layouts, such as those pertaining to thermal mass energy storage, electromagnetic and chemical energy storage, hydrogen energy storage, and energy storage systems.

What does XJTU President Wang Shuguo say about the energy revolution?

In his speech, XJTU President Wang Shuguo pointed out that the energy revolution is related to the sustainable development of the world in the future, and more importantly, the great rejuvenation of the Chinese nation. Wang said he believes that constructing the energy storage platform can solve the problem of energy technology innovation.

Xi'an Jiaotong University addresses these concerns proactively by developing energy storage systems that prioritize sustainability at every level. The platform researches not only the ...

With the rapid development of renewable energy, electric vehicles, and portable electronic devices, efficient and fast charge/discharge energy storage devices have become one of ...

The National Energy Storage Technology Industry-Education Integration Innovation Platform was launched on Feb 23 at iHarbour, Xi'an Jiaotong University (XJTU).

Utilizing the technology of electrolysis of water to produce hydrogen coupled with fuel cells, energy storage and conversion between electrical energy and chemical energy can be achieved.

Xi'an Jiaotong University, headquartered in Xi'an, Shaanxi province in Northwest China, has created a new major entitled Energy Storage Science and Engineering for its new school term which started on ...

In a groundbreaking development that could revolutionize the energy sector, researchers at Xi'an Jiaotong University have unveiled a novel approach to 3D printing titanium scaffolds with ...

Jiaotong University Energy Storage System

Significant advancements in energy storage technologies, driven by the Xi'an Jiaotong University National Energy Storage Platform, not only contribute to improved energy systems but ...

In the research of microgrid technology, it is one of the early research teams practicing microgrid technology in China and continuously leads the technological development.

Recently, the Thermal Chemical Energy Storage Technology Joint Research Center jointly established by Shouhang and Xi'an Jiaotong University held a 2025 annual project summary ...

In this paper, an innovative power-cooling integrated system based on gas turbine, Kalina cycle system, ejector refrigeration cycle (GT-KCS-ERC) is proposed.
