

Kiribati energy efficiency

The Kiribati National Energy Policy (KNEP), established in 2009, serves as a strategic framework to provide accessible, reliable, affordable, clean, and sustainable energy options, thereby enhancing ...

Kiribati has joined other Pacific Islands countries and territories (PICTs) to enact legislation to facilitate an accelerated transition to renewable energy and energy efficiency.

Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your ...

Energy efficiency and electric vehicle strategies will provide multi-fold benefits in the long term. Increasing renewables in power supply provides the highest potential in GHG emission reduction as ...

The KIER is Kiribati's comprehensive energy roadmap, which takes into account renewable energy and energy efficiency potential in all sectors from 2017 to 2025.

The savings potentials are calculated based on the assumption that Minimum Energy Performance Standards are implemented in 2022 at a level derived from the United for Efficiency Model ...

The findings of this roadmap show that power sector is a key area, where the ongoing efforts from the deployment of solar PV should be continued and complemented with and improvement of efficiency ...

Increasing the adoption of minimum energy performance standards and labelling (MEPSL) for lighting, refrigeration and air-conditioning as well as introducing electric vehicles for government ...

primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end

The Energy Planning Department is responsible for guiding and regulating Kiribati's energy sector. Our work focuses on ensuring energy security by making sure that electricity and fuel are safe, reliable, ...
