

The investment environment and the dominant position of Changzhou Longteng in the field of solar thermal power generation, the construction of a total of 500,000 kilowatts of solar thermal power ...

The trough solar collector system developed by Changzhou Longteng Solar Equipment Co., Ltd. has recently passed the national science and technology achievement appraisal carried out ...

On December 29, 2015, Changzhou Longteng officially delivered the first batch of 2055 high-temperature vacuum heat collecting tubes supplied to a 50MW commercial trough power station in ...

On the afternoon of June 15, 2018, Beijing Shouhang Aiqiwei Energy Saving Technology Co., Ltd. and Yumen Longteng Xinneng Photothermal Development Co., Ltd. held a signing ceremony to sign the ...

Solar thermal power generation technologies Solar Thermal Power systems, also known as Concentrating Solar Power systems, use concentrated solar radiation as a high temperature

The National Energy Administration recently conducted a scientific and technological achievement appraisal of the ‘Key Technology and Demonstration of Trough Solar Collector System’ project ...

The Vast Solar Port Augusta Concentrated Solar Thermal Power Project involves the development, construction and operation of a 30 MW / 288 MWh Concentrated Solar Thermal Power (CSP) plant ...

Longteng Special Steel has fully implemented photovoltaic power generation projects and actively used the contract energy management model to cooperate with Huaneng.

The future and development prospects of solar thermal power generation technology are finally discussed.

The new generation of high-efficiency and low-cost Longteng RT86 large parabolic trough collectors use the most advanced spatial frame structure internationally and have completely ...
