

New Vertical Data Center Rack for Oilfield Use

What makes orv3 a good data center rack?

Built for scalability, performance, and reliability, our ORv3 rack sets the benchmark for modern data center architecture. The fully welded frame structure is built according to the OCP specifications to meet the demands of Hyperscalers.

Why should a company choose delta modular racks?

Delta is a stalwart and powerful partner for companies that strive to offer the best possible service, and then to surpass the benchmarks of outstanding performance that they themselves set. With Delta modular racks, the networks and data centers of exceptional companies can soar to new levels of excellence.

Why should you choose a data center rack?

The racks are engineered to be easy to stack in rows, and to be highly customizable in order to cater to the unique needs and environment of each data center. Each one features a split-rear-door design, which reduces the amount of space required for hot aisles, and which also makes the already-easy maintenance even simpler.

Why should you choose custom server racks & network cabinets?

Starting with flexible, easily installed, adaptable and pre-configured customized server racks and network cabinets saves you costs, footprint and it increases the performance, efficiency, and reliability of your critical infrastructure. Let's discover the data center custom containment solutions that help you reach your objectives.
