Northern Divide Energy Storage LLC, a subsidiary of NextEra Energy Resources, has received regulatory approval to construct a 100-MW battery energy storage system (BESS) near the ...

North Dakota approved its first two large battery storage sites, but a regulator warns future projects must better address fire risks.

Huawei has also partnered with Hungarian firms to develop one of Central Europe's largest solar energy storage units in Szolnok, expected to double Hungary's current energy storage capacity and facilitate ...

This study investigates the issues and challenges surrounding energy storage project and portfolio valuation and provide insights into improving visibility into the process for developers, capital ...

The project was awarded a siting permit by the North Dakota Public Service Commission (PSC) following a public hearing in late 2025. The plan was put forward by Northern Divide Energy ...

These calculations help provide a comprehensive understanding of the cost-effectiveness, return on investment, long-term operating costs, and net cash flow of an energy storage project.

The 2020 Cost and Performance Assessment provided installed costs for six energy storage technologies: lithium-ion (Li-ion) batteries, lead-acid batteries, vanadium redox flow batteries, ...

Accelerated by DOE initiatives, multiple tax credits under the Bipartisan Infrastructure Law and Inflation Reduction Act, and decarbonization goals across the public and private sectors, energy storage will ...
