

Opening an energy storage battery factory

Why is Tesla launching a battery factory in China?

The battery factory marks the company's first energy storage system factory outside the US to manufacture its energy storage batteries known as Megapacks, and is also another major investment for Tesla in China following the inauguration of its Shanghai Gigafactory in 2019.

Where is Tesla's first energy storage plant located?

Tesla's first overseas energy storage plant starts operating as global competition from Chinese firms and pricing pressures mount. Tesla has officially announced the start of production at its Shanghai energy storage factory, the company's first Megapack manufacturing facility outside the United States.

When will Tesla's Megapack energy storage batteries be made?

(With input from Xinhua) U.S. carmaker Tesla commenced construction of a mega factory in Shanghai on Thursday, to produce Megapack energy storage batteries, as the milestone project is slated for mass production in the first quarter of 2025.

Will Tesla open a Megapack battery plant in Shanghai?

Tesla's plan to open a Megapack battery plant in Shanghai was announced last April, cementing another foothold for the company in China. The land acquisition deal for the project was signed last December, and it received a construction permit earlier this month.
