

OverviewFacilitiesConstitutionHistoryDirectors and staffInstruments past and presentBibliographyExternal linksThe first site was the Paris headquarters established in 1667 by King Louis XIV of France. This facility had various work done on it over the centuries, and in 1927 the Meudon Observatory was added, which included a new site and facilities. It was built in 1891. In addition to these sites, the Marseilles Observatory became a branch of the Paris O...

In a groundbreaking move for sustainable energy, the world's largest floating and mobile solar power plant has been unveiled along the banks of the Seine in Paris.

Paris Observatory produces French legal time, ephemerides of the Sun, Moon and solar system bodies, and operates state-of-the-art radio telescopes at Nançay. It offers academic training (Masters, PhD), ...

Let's face it - Paris isn't exactly known for year-round sunshine. But here's the kicker: modern photovoltaic energy storage systems are making solar power viable even in the City of ...

After the end of the Olympic and Paralympic Games, the 15 solar power plants installed by EDF ENR on the roofs of buildings in the athletes' village will be integrated into a collective...

Thanks to its newly tilted orbit around the Sun, the ESA-led Solar Orbiter spacecraft is the first to image the Sun's poles from outside the ecliptic plane. This unique viewing angle will change our ...

Located in the Bellevilles district, just outside the northern Paris suburbs of Saint-Ouen and Saint-Denis, the village buildings are fitted with panels manufactured by Photowatt, a subsidiary ...

It is the travelling version of a permanent exhibition created in 2007 in the gardens of the Meudon site of the Paris Observatory, where the Solar System is represented on a scale of 1 meter ...

Even into the 21st century solar observations are conducted at the Meudon site, and the preserved Great Refractor (Grande lunette) and astronomical gardens overlooking the city of Paris have ...

The VO Solar System Portal is the result of many years of fruitful collaborations with worldwide astronomers and science teams, in particular the TOP team of the Lagrange laboratory ...

In addition to the solar farm, We Energies has a natural gas-fired "peaker" plant in Paris and just recently got approval to build another over the objection of environmentalists.

Paris civilian solar system
