How to install solar panels?

The first step in solar panel installation is fixing the mounting structure to support the panels. The whole mounting structure must be tilted and have an angle between 15 to 20 degrees to have maximum sunlight exposure. For countries in the Northern Hemisphere, the best direction to face solar panels is south because it gets maximum sunlight.

How much does a solar panel installation cost?

Solar panel installation costs range from \$15,000 to \$30,000 for an average American home, with a payback period of 6 to 10 years depending on your state's incentives and sun exposure. This comprehensive guide walks you through every step of your solar project, from initial assessment to system commissioning.
