

Rent out old photovoltaic panels

How much does a solar panel lease cost?

Solar panel leases cost between \$50 and \$250 per month, on average. The exact amount the homeowner pays depends on the amount of energy they use at home, the company supplying the lease, their location, and their credit score. The customer can choose between a number of financing options that best suit their needs.

How does a solar lease work?

The solar lease company kicks things off by offering a contract to the homeowner- outlining how much the user would like to pay upfront for the panels, which can be as little as \$0, and the amount they'll pay each month. Once the contract is finalized, it's time to crack on with the solar panel installation.

How much did solar panels cost in the 2000s?

In the early 2000s, it was nearly impossible for the average US homeowner to buy a set of solar panels. It was simply too expensive - with a typical solar panel system costing more than \$50,000.

Is solar leasing right for You?

Thankfully, solar leasing offered an affordable alternative, allowing people to benefit from solar energy without having to fork out thousands of dollars for the upfront cost. Fast forward to today, and this system is still helping thousands of Americans install solar panels on their property. Think solar leasing might suit you?
