

Romanian solar tiles

Which Romanian roof provides energy for an entire house?

The first FALT SOLAR roof in Romania, which provides energy for an entire house, has been installed in Paulesti, Prahova County. FALT SOLAR is a roof with integrated photovoltaic cells and belongs to the BIPV (Building Integrated Photovoltaics) category.

What are the different solar energy schemes in Romania?

Some of the most notable schemes include: Feed-in-tariff (FIT) scheme: Under this scheme, renewable energy producers in Romania, including solar energy producers, are guaranteed a fixed price for their electricity for 15 years. The FIT rates for solar energy are revised every year, and they depend on the type and size of the solar project.

Why did Metigla launch a solar roof in Romania?

The launch in Romania of FALT SOLAR, the roof with integrated photovoltaic cells, is a natural step in line with Metigla's mission to cover the well-being of people and businesses with smart, sustainable, and innovative solutions. Is Romania a solar market?

According to the International Renewable Energy Agency (IRENA), Romania is now considered one of the top ten solar markets in Europe, with a total installed solar photovoltaic capacity of 1,545 MW as of the end of 2023. One primary driver was the EU Modernization Fund.

Solar roof shingles tiles, like the FlexSol Solar Roof Tile, are designed to blend seamlessly with the existing architecture of a building while generating electricity from sunlight.

Product name: Solar Panels 30W 100W Photovoltaic PV Station Solar Module Roof Tile Material TOP: Photovoltaic Module Material BOTTOM: Tempered Glass MOQ: 20 Square Meters Application: ...

We are proud to install the first FALT SOLAR roof in Romania and we are confident that it will serve as an example for people and companies who want to adopt solar technology and ...

Our wide range of tiles and accessories allows us to meet all construction requirements. The clients are the most important for us, so we offer a personalized and specific treatment according to their needs.

With an average of 1,900 to 2,400 annual sunlight hours, Romania has significant natural potential for solar PV development. Yet, the country has not set ambitious targets for renewable ...

The renewable energy sector in Romania is at an exciting crossroads, with the country looking to address both domestic energy demand and international requirements to reduce carbon ...

Solar shingles, also known as solar roofs, photovoltaic shingles, are solar panels that are designed to look like and function as conventional roofing materials, such as asphalt shingles or ...

Romanian solar tiles

Since 2017, Ewolt Romania has consistently provided affordable and reliable solar solutions, combining innovative technology with the highest quality workmanship. In our showroom you will find ...

Since 2010, we have specialised in providing solutions for installing solar photovoltaic systems. We develop and produce solid mounting systems, easy to assemble on all types of roof; ...

Pasionati de energia regenerabila si sustenabilitate, oferim clientilor nostri sisteme fotovoltaice on grid, off grid si hibrid care protejeaza atat mediul inconjurator cat si portofelul clientilor nostri.
