OverviewBackgroundThemes and philosophyArt movement and aestheticsFictionCriticismSee alsoFurther readingThe term solarpunk was coined in 2008 in a blog post titled "From Steampunk to Solarpunk", in which the anonymous author, taking the design of the MS Beluga Skysails (the world's first ship partially powered by a computer-controlled kite rig) as inspiration, conceptualizes a new speculative fiction subgenre with steampunk's focal point on specific technologies but guided by practicality and modern economics. Along a similar vein, in 2009, literary publicist Matt Staggs posted a "GreenPunk Manifest...

Solar power is hot these days. Gleaming, black solar panels soak up rays on more and more rooftops of homes and businesses providing a clean, alternative source of heat and electricity. ...
