

# Sichuan Qing drilling lithium battery energy storage

On April 15th, the People's Government of Shehong City and Sichuan Fulun Industrial Group officially signed a cooperation agreement for a lithium-ion battery cathode material production ...

"The newly uncovered lithium ores are a type commonly found in Sichuan. Such a reserve was preliminarily detected years ago, and the latest achievement was to help pinpoint the location of ...

On July 30, Great Power and Sichuan Zhongfu officially broke ground on the nation's largest user-side lithium battery energy storage project! With a first-phase capacity of ...

The next step will focus on extending and complementing the lithium battery energy storage industry chain, with an emphasis on attracting core enterprises involved in battery cell ...

Sichuan will make strategic planning for new battery R& D and accelerate breakthroughs in key core technologies such as high-purity lithium extraction and solid-state batteries.

Leveraging the region's unique geological profile, Chengze has established itself as a major producer of spodumene concentrate and lithium hydroxide, both crucial inputs for electric ...

As an important production area for raw materials of new energy batteries, Sichuan accounts for 57% of the country's total lithium ore resources, boasting unique resource advantages.

Its advantageous geographical location adjacent to Chongqing, a major automobile manufacturing hub, combined with multiple other advantages, has gradually made Sichuan and the ...

The new plant, located in the Suining Economic and Technological Development Zone, highlights the escalating shift towards sodium-ion technology as an alternative to the strained lithium ...

The Sichuan Provincial Development and Reform Commission (DRC) and the Sichuan Energy Bureau have officially released the "2025 Grid-Side New Energy Storage Project List," ...
