

Sine wave inverter SG3525

What is a sg3525 inverter?

The SG3525 is a popular integrated circuit that is widely used in the design of sinusoidal pulse width modulation (PWM) inverters. The circuit diagram of a pure sine wave inverter using the SG3525 is relatively simple. It consists of an SG3525 chip, a few electrical components such as resistors, capacitors, and diodes, and a power transformer.

What is sg3525 PWM inverter circuit diagram?

Let us take a look at the SG3525 PWM Inverter Circuit diagram and discuss its designing principle. SG3525 can control the output voltage of the inverter. It is also useful in driving MOSFET IRF520 connected to a transformer. Both MOSFET is used as a low-side connection.
