

Small solar power generation rental fee

How much does a solar lease cost?

Solar lease payments range from \$150 to \$200 per month on a standard 25-year agreement. Your actual monthly costs can vary depending on a few factors, including the system size and your energy needs, according to Landon Wimmer, CEO and owner of Empower Home Services. In most cases, the lease payment is below the utility's average electricity cost.

How much does a solar system cost?

Switch to solar with a system built for you. As electricity rates continue to rise, homeowners are turning to solar energy to reduce their monthly bills. However, the \$18,000 to \$43,000 upfront cost of purchasing solar panels is still a barrier for many.

How does a solar lease compare to a utility?

Here's how a solar lease compares to paying for electricity through a utility. Solar leases do provide a path to energy savings-- especially if the cost of utility electricity outpaces the escalator. However, buying solar panels has become the better deal in the last decade or so.

How long does a solar lease last?

Solar lease agreements are typically for 20 or 25 years and include an escalator that increases the monthly payment each year (more on that below). Solar leases can be attractive because there are zero upfront costs and immediate energy savings.
