

Solar Panel Tiles Prices

How much does a solar roof tile system cost?

To give you an idea, the average 3.5 kW solar roof tile system will cost around $\$13,000$, compared to approximately $\$7,000$ for a regular PV system. However, remember that you are also getting a new roof with your solar tiles, so a direct price comparison is slightly misleading. Information last updated in April 2025.

How much does solar roof tile cost in 2025?

Solar roof tile costs in 2025 vary significantly by manufacturer and system complexity: For a typical 2,000 square foot roof with 60% solar coverage (1,200 square feet of active tiles), total system costs range from $\$14,400$ to $\$36,000$ before incentives. Understanding the components of solar roof tile costs helps in budgeting and comparison:

Are solar panels better than roof tiles?

Solar panels, that is solar panels on slate roofs, are still the better investment overall compared to solar roof tiles. Roof tiles are expensive because you are ultimately installing a new roof, and while they look great, they can be less efficient than solar panels.

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.
