

Solar container lithium battery arm loading and unloading vehicle

The Mobil-Grid is an ISO-standard, CSC-approved maritime container that integrates a photovoltaic power plant, ready to be deployed and connected, with ...

In this article, we'll dive into how mobile solar containers work, their top use cases, and why they're one of the smartest off-grid solar solutions available today.

Microgreen offers large-scale energy storage that is reliable in harsh environments, cost effective with top energy density, and provides best return on investment.

Our certified solar specialists provide round-the-clock monitoring and support for all installed photovoltaic container systems and battery energy storage containers.

Self-unloading mobile Solar Container. Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea ...

MOBIPOWER hybrid clean power containers combine battery energy storage systems with off-grid solar containers for remote industrial sites in Canada & USA.

The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and ...

Discover our range of innovative solar panels on shipping container products engineered to meet your renewable energy needs with maximum efficiency and reliability.

This rugged single-axle trailer has a fully-integrated 2kW solar array for power generation to charge the lithium battery bank inside the insulated water-tight ...
