How much does a solar panel cost?

Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market benchmarks thereafter due to limited data availability. Solar photovoltaic module prices refer to the cost of the solar panel itself, and do not include installation or other system components.

Why do solar modules cost so much?

In the past solar module cost used to be the dominant factor in PV capital investment but aggressive competitions among manufacturers have helped lowering the module pricing significantly in recent years. For the OPEX, the costs of preventive maintenance and the inverter warranty extension play the biggest role.
