How much power will Spain's energy storage projects add to the grid?

The 45 battery and thermal energy storage projects allocated European Union subsidies will add more than 779 MW/3.4 GWh of capacity to the Spanish grid.

How will Spain invest in energy storage?

This will include battery and pumped hydro plants, as well as potentially some thermal storage associated with concentrated solar power technology, which Spain is a leader in. The Spanish government is also looking to create an energy storage value chain within a EUR1 billion investment program.

How much storage capacity will Spain have by 2030?

The country plans to have 22 GW of storage capacity in place by 2030, said the ministry. This will include battery and pumped hydro plants, as well as potentially some thermal storage associated with concentrated solar power technology, which Spain is a leader in.

Why is pumped hydro storage important in Spain?

Pumped hydro storage already plays an important role in helping to balance large amounts of renewable energy on the Spanish grid, which as of April 2024 was operating with between 60% and 70% renewable energy penetration. Battery storage, meanwhile, is increasingly being co-located with renewable energy plants to avoid revenue cannibalization.

Spain's proposals are for grid operator Red Eléctrica de España to secure capacity five years and one year in advance. Initially the big winners of a Spanish capacity market are expected to ...

The Spanish government approved Royal Decree 7/2025 on June 24, resolving several long-standing obstacles hindering the secure and lawful deployment of energy storage projects. This ...

The government of Spain is launching EUR280 million (US\$310 million) in grants for standalone energy storage projects, thermal energy storage and reversible pumped hydro to go online in 2026.

With the Spanish government's ambitious plan to deploy 20GWh of energy storage by 2030 [1] [3], the race is on to find the most reliable Port of Spain energy storage partners. But here's ...

Spain quantified its storage needs in line with decarbonisation targets established in the 2021-2030 national energy and climate plan (NECP), which sets the share of renewables in gross ...

Spain's ministry for the ecological transition said on Monday it has provisionally awarded EUR 839.7 million (USD 977.4m) in funds to 143 energy storage projects that will add about 2.4 GW ...

The government of Spain has chosen the 143 energy storage projects that will receive capex support from an

EU-backed scheme, totalling nearly 9GWh of capacity.

The government of Spain is launching EUR280 million (US\$310 million) in grants for standalone energy storage projects, thermal energy storage and reversible pumped hydro to go online in ...

This article reviews the current state of the capacity market in Spain, its design, and its implications for storage. Carlos Redondo addresses the topic considering the differences that may ...

Some 35 battery sites with a total scale of 690.2 MW/2.82 GWh will receive EUR150 million under the program. A further 10 thermal storage sites will receive EUR6.48 million and add 88.35 ...
