

Specifications of Folding Container High-Pressure Type Products

What is a high cube container?

Manufactured from either Aluminum or steel, they are suitable for most types of cargo or general cargo. Aluminum containers have a slightly larger payload than steel, and steel containers have a slightly larger internal cube. With high cube containers, you gain an extra foot in height compared with general-purpose containers.

What is a cargo container?

A freight container, totally enclosed and weatherproof, with a rigid roof, rigid side walls, and floor, having at least one of its end walls equipped with doors and intended to be suitable for the transport of cargo of the greatest possible variety. This is by far the most common type of container.

What is an open top container?

Allowing cargo to be loaded from the top, open top containers are particularly suitable for bulky cargo such as machinery. They are fitted with a PVC tarpaulin cover and attachable bows with cable sealing devices. The container doors can be removed to make the stuffing of cargo more convenient. Manufactured from steel.

What is CMA CGM's 'dry' container fleet?

CMA CGM's fleet of standard "dry" containers is the largest in the market. In today's world, these easy-to-handle containers are a key asset when it comes to shipping all your cargo, whatever the type of product involved. Do you need to customize them to fit a specific cargo?
