

# The latest distribution map of photovoltaic energy storage projects

Berkeley Lab collects, cleans, and publishes project-level data on distributed\* solar and distributed solar+storage systems in the United States. The data are compiled from a variety of sources, ...

This map contains multiple layers showcasing solar infrastructure within the US. The map visualizes solar power plants, electric power transmission lines, and the photovoltaic (PV) ...

Interactive U.S. Solar Farms & Solar Parks Map showing plant boundaries, owners, nameplate capacity (MW), and power output. Based on EIA-860/860M/923. Filter by utility-scale photovoltaic and CSP ...

Interactive map of solar farms in the US. View the largest projects, track new developments, and explore capacity data across all states.

The utility-scale data covers all operating solar farm phases with capacities of 1 megawatt (MW) or more and all announced, pre-construction, construction, and shelved projects with capacities greater than ...

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated ...

Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. View an interactive map or download ...

View our portfolio of hundreds of operating and development solar, wind, and storage projects across the United States.

To make this landscape easier to explore, I've developed an interactive geographic distribution map that integrates every announced project from 2025 through 2030 collected by the ...

The USPVDB Viewer lets you discover, visualize, and interact with the USPVDB through a dynamic web mapping application.
