

# Tiling module double-sided double-glass module

Sealing with PIB based sealant Stronger water resistance, greater air impermeability to extent module lifespan.

Excellent product appearance and performance Two-sided double-glazed modules, symmetrical structural design, low risk of hidden cracks.

In order to create the ultimate cost-effective product, SunEvo Solar launched a new generation of ultra-high efficiency HJT solar modules, the Evo 6 Pro monocrystalline N-type HJT bifacial double glass 680-700Watt ...

While traditional backsheets are somewhat permeable to free radicals, the double glass module is not. The same can be said for moisture that can seep in from the sides of the module and get trapped in the double ...

Adopted SunEvo latest S-TOPCo 2.0 technology, No polysilicon wrap around, Full electrical isolation, Zero leakage current; Much Safer for roof. Higher power output even under low-light environments like on cloudy or ...

Frame connects to acoustic ceiling tile (ACT) grid, bulkhead, drywall soffit, metal stud kickers, or cornice rail Base track secures to the base building with carpet grippers, double-sided tape, or seismic anchoring

If you are interested in any of our products or would like to discuss a customized order, Please feel free to contact us.

The bifacial dual sided glass module (G2G) generates more electricity by converting direct, radiant and scattered solar energy on both the front and the back side of the module.

The new n-type Silk&#174; Nova Duetto high efficiency glass/glass double-sided panel with 156 half-cut cells, with a power range from 620 to 630 Watts, completes the FuturaSun model range.

Double glass modules use an innovative design with glass on both sides, offering higher photovoltaic conversion efficiency and better environmental characteristics.
