

Timor-Leste Wind Solar and Energy Storage Project

Mooreast's plan, to be developed over five to 10 years, includes upgrading grid transmission infrastructure for renewable ...

The studies will assess offshore sites suitable for floating wind, solar, hydroelectric, tidal, current and wave projects, Mooreast said, ...

Technology Scope: The assessment will cover potential offshore locations along the Timorese coastline for harnessing energy ...

Singapore-based Mooreast has started feasibility studies to develop up to 500 MW of floating renewable energy projects in Timor-Leste in Southeast Asia.

Mooreast said it will conduct due diligence and assessment of locations off Timor-Leste's coastline that would be suitable for development of projects to generate energy from ...

The landmark project includes drafting and negotiating a power purchase agreement (PPA) and an implementation agreement with the ...

Mooreast said it will conduct due diligence and assessment of locations off Timor-Leste's coastline that would be suitable for development of projects to generate energy from floating ...

With close to three decades of experience, Mooreast is applying its track record and expertise in mooring solutions to floating renewable energy projects, in particular floating ...
