

Toshiba lithium titanate battery cell

Because of enhanced long-life performance, the 20Ah cell is suitable for applications that are continuously charged and discharged. Low-temperature operation. The 20Ah cell can be charged ...

These lithium titanate batteries (LTO) are ideal for battery kits in high-demand applications, including backup power and electric mobility DIY kits requiring fast and safe energy access. Buy Toshiba LTO ...

In case of an internal short circuit, the lithium titanium oxide (LTO) in the anode layer of SCiB™ phase transforms to being highly resistive, thus minimizing risk of drastic current flow that may lead to ...

Fast Charge Rates - It takes only 6 minutes to charge from SOC 0% to 80%, SCiB batteries increase customer up-time and productivity and enable efficient capture of regen energy. High Output ...

Long Cycle Life: This battery boasts an impressive 20,000 cycle times, ensuring that it can withstand frequent charging and discharging without losing its performance, making it ideal for applications ...

SCiB(TM) is a rechargeable battery with outstanding safety performance that uses lithium titanium oxide for the anode. SCiB(TM) has been widely used for automobiles, buses, railway cars, and other vehicles; ...

Toshiba International Corporation provides reliable motors, drives, UPS, and industrial power solutions designed to reduce downtime, lower maintenance costs, and support long-term operational resilience.

Toshiba 2.4V 20Ah LTO Battery Cells are a safe, high-performance, long-life, rechargeable battery solution for a wide array of applications ranging from electric vehicles to grid energy storage.

Toshiba has launched mass production of the 23Ah SCiB(TM) cell, which maintains the advantages of the 20Ah cell such as rapid charging, low-temperature operation, long life and a high level of safety.
