

Ukrainian energy storage project design unit

DTEK and Fluence have begun commissioning Ukraine's largest battery energy storage system, a 200 MW/400 MWh installation spread across six sites that represents one of the biggest ...

RTE international has carried out comprehensive feasibility studies for the installation of a battery storage system in Ukraine. This system is intended to manage frequency control reserves ...

Voltage Group delivered design and general contracting services for a 2 MW / 4 MWh battery energy storage system (BESS) in Ukraine. The project included the new construction of the BESS facility ...

DTEK's Fluence Gridstack battery units at one of six energy storage sites across Ukraine, part of the country's largest battery energy storage project announced on July 10, 2025.

Due to the ongoing war and limited access to Ukraine, this marks the first project that Fluence has commissioned entirely remotely. To make this possible, 20 Ukrainian power engineers ...

Fluence has successfully completed the largest battery-based energy storage project in Ukraine, showcasing its leadership in energy storage solutions. The project was constructed and ...

DTEK has signed a loan agreement with a consortium of Ukrainian banks to raise about UAH 3 billion (equivalent to EUR67 million) to implement a project of modern energy storage systems in ...

The project, worth approximately 3 billion hryvnias (around EUR67 million), aims to create one of the largest energy storage systems in Eastern Europe. The consortium includes Oschadbank, ...

In January 2025, Ukrainian energy giant DTEK committed EUR140 million to deploy six battery storage facilities across multiple regions. The Fluence-powered systems will provide: "This isn't just about ...

Where do new energy technologies, such as renewable energy from solar and wind, and energy storage, fit into the current need for Ukraine to maintain or enhance energy supply security ...
