What is a PV combiner box?

In every photovoltaic (PV) system, stable power generation relies on more than panels and inverters. Hidden behind the scenes is a critical piece of equipment: the PV combiner box. Though easy to overlook, this device plays a decisive role in current collection, circuit safety, surge protection, and intelligent monitoring.

What is a photovoltaic AC combiner box?

The photovoltaic AC combiner box is used in a photovoltaic power generation system with string inverters and is installed between the AC output side of the inverter and the grid connection point/load. It is internally equipped with input circuit breakers, output circuit breakers, and AC lightning arresters.
