

Waterless cleaning equipment for photovoltaic panels

SolarCleanso designs and manufactures solar panel cleaning robots. Our solutions ensure fast, efficient, and water-free cleaning, helping optimize the performance and maintenance of solar installations ...

Powered by our proprietary Airwash Technology, Unicorn eliminates the need for water, chemicals, or manual intervention. It offers a completely dry, contactless ...

Waterless cleaning uses robotic technology and advanced brushes to remove dirt and debris without the need for water. These robots are designed ...

Discover how solar panel waterless cleaning robots provide efficient, eco-friendly solutions while conserving water and reducing cost.

Our Waterless Solar Panel Cleaning Robot operates autonomously, navigating solar panel arrays with precision. Its dry cleaning techniques ensure that panels are thoroughly cleaned without the use of ...

This innovative cleaning robot not only offers sustainable solar panel cleaning solutions, but it can also be implemented in large solar parks. Equipped ...

Introducing LOTUS-A4000, a fully-autonomous and waterless solar panel cleaning robot. It's an intelligent, independent, and one of the most advanced ways of ...

In this study, we designed an efficient automatic waterless solar panel cleaning system for small PV arrays using Arduino uno microcontroller, real-time clock, air blower, and brushes.

Discover the benefits of a waterless solar panel cleaning robot for efficient, eco-friendly maintenance of your solar panels!
