

Wind blade generator wind blade crane

Bigge has a specialized fleet of crawler and rough terrain cranes dedicated to wind turbine erection. All crawlers are available for bare rental nationwide out of any of our 20 locations coast to coast, and ...

We recommend our Vortex Generators to all turbine owners and operators. You can rely on a long proven and reliable technology to generate additional yield easily and quickly. We have over 10 ...

Suitable for onshore and offshore operations, on floating and bottom-fixed wind turbines. Travels up and down the WindSpider structure built around the turbine tower, allowing for controlled installation and ...

This product is an ultra-heavy-duty intelligent engineering crane specifically designed for onshore wind turbine installation, integrating three core capabilities: extremely high working altitude, precise wind ...

This revolutionary lifting system is transforming what a crane means to offshore wind facilities, workers, and their families. The Bardex OmniCrane provides a complete solution for lifting and positioning all ...

This is where our LR crawler cranes come in handy, at onshore installations or mountainous areas, flat lands or even offshore sites. In our range of crawler cranes there is a model for every task in the ...

Ready to invest in cost-effective wind turbine cranes that are right for your lifts? We're here to help with everything from planned builds and maintenance to surprise repair jobs.

We have equipment to specialize in just about any type of wind job: New construction, maintenance, generator replacement, single blade replacement, inspections, and more.

The heavy components of wind turbines such as blades, nacelles, and towers require specialized wind power cranes and lifting devices due to their weight and size.

Wind turbines are used to generate electricity in areas with strong, steady winds - either on land or offshore. Almost all modern turbines being produced today use a three-bladed, upwind design. Wind ...
